

ICPerMed Working Group 5 - Health Economic Value of Personalised Medicine Approaches

Our Focus

Value assessment of Personalised Medicine (PM) approaches, including societal aspects and real-life setting

Our Aims

Consider broader societal impacts of Personalised Medicine

Include patients' perspective (in collaboration with the patients' empowerment WG)

Pair the health economic aspects with the implementation aspects (in collaboration with the implementation WG)

Promote a comprehensive approach encompassing:

Prevention
Diagnosis
Treatments

Including aspects related to implementation

Support a life-cycle approach to health economic evaluation

Demonstrate the value by identifying and detailing real-life health economic exemplars

Discuss and document the economic value of Personalised Medicine

Our Activities

Collaboration with HEcoPerMed and other stakeholder groups, initiatives and consortia

Provide input for the development of the European Partnership on Personalised Medicine under the Horizon Europe umbrella

Development of an ICPerMed workshop on the health economic value of PM based on real-life examples

Identify Best Practice Examples in order to demonstrate the contribution of health economics in enabling implementation of Personalised Medicine approaches

Support for ICPerMed events; ICPerMed 2022 workshop
